

## DECLARATION OF CONFORMITY REACH REGULATION

Protection of the environment and human health, as well as safe handling of chemicals, are the focus of the chemicals regulation REACH (Regulation 1907/2006/EC) concerning the classification, labelling and packaging of substances and mixtures.

Substances of very high concern are named either on the candidate list for authorisation or in Appendix XIV of the regulation and require approval or may be restricted in terms of use. For substances on the candidate list, duties to communicate information apply within the supply chain.

mibostahl tools, trading and service GmbH does not manufacture substances or preparations, and, registration as a downstream user, is not subject to registration.

We have consulted our suppliers regarding REACH and obtained confirmation of their compliance with REACH.

This document certifies that the materials we use do not contain any substances on the current candidate list (SVHC list: <https://echa.europa.eu/en/candidate-list-table>) in a concentration of more than 0.1% by mass, and that they are in conformity with Annexes XIV & XVII of the REACH regulation.

Yours faithfully,

Dipl.-Ing. Wolfgang Japes  
Quality Management Officer – Technical Manager
