
CABLE REPAIR LINES MADE IN GERMANY

THE BENEFITS: HIGH QUALITY, NO ADDITIONAL COSTS
FOR UNNECESSARY MANUAL CRIMPING TOOLS,
AND LESS TIME REQUIRED FOR THE REPAIR PROCESS

MIBOstahl[®]
tools, trading and service GmbH

6 THINGS YOU REQUIRE FOR THE REPAIR PROCESS ON THE WIRING SYSTEM:

Pre-crimped repair cables
of the highest quality
according to industrial
standards.

Our ready-crimped repair lines
ensure greater productivity in
the workshops and reduce the
costs for crimping tools.
In particular the failure rate in
the repair process is reduced,
since crimping by hand is no
longer required.*
All repair lines undergo careful
quality control before they are
delivered.

*In accordance with DIN EN 60352-2:2006-11
Solderless connections – Part 2: Crimped
connections – general requirements, test methods
and practical guidance, as well as special
standards for the automotive sector.

1. We manufacture the repair cables according to your custom requirements and specifications. All lengths, colors, bundling types and quantities are available.

2. Extraction tools will be put together individually or as a set depending on the repair lines.

3. Crimp connector “mibo-crimpseal”
Diameters: 0.1–0.5 / 0.5–1.5 / 1.5–2.5 / 4.0–6.0 mm²

Alternatively: Solder connector “mibo-solderseal” (*step 4 no longer necessary*)
Diameters: 0.4–1.7 / 1.3–2.7 / 1.8–4.5 / 2.8–6.0 mm²

4. Crimper “mibo-crimp 02” / 0.5–6.0 mm²
Crimper “mibo-crimp 03” / 0.1–0.5 mm²

5. Automatic self-adjusting wire stripper “mibo-strip 01”

6. Hot air gun (our recommendation: Steinel)
